Createspace Independent Publishing Platform, United States, 2017. Paperback. Condition: New. Language: English. Brand new Book. Army Techniques Publication ATP 5-0.6 Network Engagement JUNE 2017 Humans are complex, social creatures. Attempting to analyze them to determine if we should engage them is a combination of art and science and often depends upon the purpose for that engagement and the paradigms from which we perceive them. The Army engages human networks through the range of military operations in order to achieve U.S. objectives. Network engagement provides staff orientation for unity of effort Network engagement supports the overarching framework provided by mission command to guide the tailored application of current doctrinal processes, such as the Army design methodology, the military decisionmaking process (MDMP) and intelligence preparation of the battlefield/battlespace, targeting, or assessment. Network engagement helps to bind the staff together and introduces them to the networks that exist within their area of operation. As described in this publication, network engagement, can and should be applied in any operational environment (OE) and across the spectrum of conflict. Network engagement is an evolution of attack the network. While attack the network focused on neutralizing the threat network, this focus often led commanders to overlook friendly and neutral networks. Past techniques to grapple with the challenges of some of the different components of network engagement have included forming ad hoc fusion centers, employing the civil military operations center (CMOC), establishing an information operations working group, and enforcing the use of a District Stability Framework (DSF). Network engagement provides the doctrinal guidance to conduct network engagement activities integrated into the Operations Process. These activities change the commander's focus from attacking threat networks to identifying, defining, and effectively interacting with friendly and neutral networks, while simultaneously engaging threat networks. There are significant overlaps between network engagement and information...
